

# Reasons for incorporating the global dimension in science education

Source: unit author, Philippa Gardom Hulme.

Reason for incorporating the global dimension in science	Could this reason be addressed by an activity based on the information in . . .	
	newspaper article 1?	newspaper article 2?
To challenge racism		
To promote respect for those from other cultures		
To truly represent contemporary science		
To truly represent the diverse roots of science		
To provide interesting and motivating contexts for teachers and students		
To meet the requirements of the science national curriculum		

To deliver the citizenship curriculum		
To encourage students to explore social, moral and ethical issues		
To raise awareness of global interconnections
